

Summary Curriculum Vitae

Dr Daniel Birchall MA MB BChir (Cantab) MRCP FRCR MD MBA

- Current Position:** Consultant Neuroradiologist (1999 – present)
Regional Neurosciences Centre, Newcastle-upon-Tyne
Royal College Du Boulay Professor of Neuroradiology
Board Member, BSNR Academic Committee
- Previous Appointments:** Head of Service, Neuroradiology 2014 - 18
Head of Service, Neuroradiology 2006 - 09
Chair, Trust Information Systems Strategy Board
Deputy Senior Editor, *British Journal of Radiology*
Board Member, British Society of Neuroradiology
Committee Member, BSNR Standards Committee
College Tutor, Royal College of Radiologists
- Academic Qualifications:** BA Hons, Jesus College Cambridge University 1986
MB BChir, Cambridge University 1988
MA, Cambridge University 1990
Member of the Royal College of Physicians, London 1992
Fellow of the Royal College of Radiologists, London 1997
MD, Cambridge University 2003
Executive MBA, Newcastle University Business School 2009
- Academic Achievements:** > 100 publications
Distinction, Executive MBA
British Heart Foundation primary investigator grant holder
- External Appointments:** Chair of Governors, Newcastle Preparatory School
- Medico-Legal Experience:** > 400 medico-legal reports provided since 2008
75% Defendant : 25% Claimant

Summary of National Roles, Academic Record, and Managerial Achievements

1. National Role: British Society of Neuroradiologists & Royal College of Radiologists

In 2017, I was appointed as the du Boulay Professor of Neuroradiology on behalf of the Royal College of Radiologists and the British Society of Neuroradiologists. This is a prestigious national role that involves visiting radiology training centres around the United Kingdom, primarily in a teaching and an ambassadorial role.

I was a founder member of the Standards in Training Committee, of the British Society of Neuroradiologists. My role overseeing Standards in Neuroradiology included co-authorship of the primary standards document relating to training, facilities and service provision in Neuroradiology, and used as part of the national framework for Neuroradiology in the UK.

I am a sitting member of the Academic Committee of the Society of Neuroradiologists, which has oversight of the organization of national conferences and training courses, and of the promotion and support of academic Neuroradiology in the UK.

I initiated and drove an innovative National Neuroradiology Benchmarking Programme on behalf of the British Society of Neuroradiologists, liaising with all UK units, assimilating information from participating centres in relation to workload and work intensity, synthesizing the information into a unit-specific contextualized narrative, and publishing this as a resource for service planning. This benchmarking study was one of the first of its kind in the UK in relation to radiology service provision and represents the application of business research techniques to practical radiology service provision.

2. Summary of Academic Record

I have published over 100 papers, as lead author in a large proportion of these.

Over half of the publications have been in high ranking international scientific journals with Impact Factors of > 2. I have published 9 papers in *Neurology* [Impact Factor 8.2] and 7 papers in *JNNP* [Impact Factor 4.9], as well as being co-author on papers accepted for or published in *Lancet*, *Nature Communications*, *Circulation* and *Brain* [Impact Factors 10 – 39]. I have also supported the mainstream British radiology journals, publishing 20 times in *Clinical Radiology* and *British Journal of Radiology* (including Editorials).

I have presented many times at conferences, the vast majority of which have been international and national radiological congresses.

The subject matter reflects the wide range of academic interests that I have fostered. The majority of my presentations over the course of 2013 – 2019 have related to my collaborative work in relation to the cognitive and psychophysical aspects of radiology reporting practice.

I am one of a small number of consultant radiologists awarded M.D., for my thesis entitled “A Study of the Nature and Clinical Significance of Rotational Deformation in Adolescent Idiopathic Scoliosis using Three-Dimensional MR Imaging”. This was the culmination of four years’ work and was based on successful grant funding from the British Scoliosis Society.

In 2009, I graduated as Executive MBA from the internationally renowned Newcastle University Business School. I was awarded Distinction for my Degree and was awarded the two available prizes: one for the Outstanding Student, and one for the Outstanding Dissertation. One of the key outputs was the final dissertation, entitled “A Study of Consultant Engagement within an NHS Foundation Trust Hospital”, the world’s first study of senior medical engagement.

I have acted as a senior editor at the British Journal of Radiology for 10 years. This role involves the review of a large number of original scientific papers each year; oversight of associate editorial reviews; administrative responsibilities including some author correspondence; the writing of Editorials and Commentaries; and liaising with leading academic groups around the country.

3. Summary of Managerial Record

I have been Head of Neuroradiology at the Regional Neurosciences Centre at Newcastle upon Tyne for two periods: 2006 – 2009 and 2015 – 2018. I successfully implemented significant strategic developments that received recognition from within the Trust, including alignment of Neuroradiology with the Trust’s Objectives; redesign of the methods of data, information and performance measurement; formulation of a formal strategy and of the required initiatives to achieve the set goals; development of an engaged workforce and high performance work systems; re-engineering of administrative and operational processes; implementation of change on the basis of clinician and patient surveys; and service modernisation through the procurement of a major equipment replacement programme. Some of the tangible outputs of this process included an increase in productivity within the MR service of 75%; an increase in scanner occupancy from 72% to over 90%; a 300% increase in the productivity of the spinal injection service; and a reduction in waiting times for MR scanning from 130 weeks to 4 weeks. During this period, the national Neuroradiology Benchmarking Study also identified Newcastle as the most productive unit in the UK.

In 2010 I was appointed to the role of Chair of Information Systems for the Trust in order to formulate and implement a systematised, unified information systems strategy that supported the Trust in attaining its Mission and Objectives. I undertook a major programme of renewal, with the following key outputs: introduction of an effective, high performance project portfolio management system; initiation of effective clinician engagement and clinical governance of the Board’s strategy and operations; implementation of effective executive reporting of progress towards objectives; and oversight of a programme of optimisation of the Trust’s IT infrastructure, organisation and service delivery. A recent tangible outcome of this process has been the ranking of Newcastle upon Tyne Trust as the leading provider of clinical information technology in the country.

American Heart Association, Orlando 2007.
European Society of Cardiology, Barcelona 2006.
[Poster presentation][Winner, Best Poster Presentation.]

MRI for the characterisation of inclusion body myositis.
British Society of Neuroradiology, London 2007.
[Oral presentation]

Lesional changes within the basal ganglia correlate with phenotypic presentation in neuroferritinopathy.
British Society of Neuroradiology, London 2007.
[Oral presentation]

Genome-wide cell-specific expression analysis identifies the involvement of the adipocytokine signalling pathway in atherosclerotic plaque rupture.
British Cardiac Society Conference, London 2007.
[Poster presentation]

A genomic approach to atherosclerotic plaque rupture.
SCMS Research Day, Newcastle 2006.
[Poster presentation][Winner, Best Poster Presentation.]

Giant cell reparative granuloma of the skull: case presentation and literature review.
European Society of Skeletal Radiology, Bruges 2006.
[Poster presentation]

Analysis of haemodynamic disturbance in the atherosclerotic carotid artery using computational fluid dynamics.
British Society of Neuroradiology, Edinburgh 2005.
[Oral presentation]

Does MR spectroscopy predict survival in gliomas?
World Federation of Neuro-oncology, Edinburgh 2005.
[Poster presentation]

Analysis of haemodynamic patterns at the common carotid bifurcation using computational fluid dynamics.

British Society of Neuroradiology, Cambridge 2004.

[Oral presentation]

Cranial MRI appearances in neuroferritinopathy.

Royal Australasian College of Radiology Annual Conference, Perth 2004.

[Poster presentation]

Use of MR imaging for the phenotypic characterisation of muscular dystrophy.

Royal College of Radiologists Annual Conference, London 2003.

[Poster presentation]

Effect of rotational deformation on the correction achieved by instrumentation in idiopathic scoliosis using three-dimensional MR imaging.

Royal College of Radiologists Annual Conference, London 2003.

[Poster presentation]

Evaluation of MR digital subtraction angiography in the investigation of acute intracranial parenchymal haemorrhage.

Royal Australasian College of Radiology Annual Conference, Brisbane 2003.

[Poster presentation]

A cross-sectional magnetic resonance spectroscopy (MRS) study in PSP and indeterminate Parkinsonism.

Association of British Neurologists, Glasgow 2003.

[Poster presentation]

Chronic cerebrovascular disease and sleep disordered breathing following stroke.

British Association of Stroke Physicians, 2002.

[Poster presentation][Winner, Best Poster Presentation.]

Evaluation of mural thickening in carotid atherosclerotic disease using spiral CT angiography.

RSNA, Chicago 2001.

Congress of the German Society for Neurology, Aachen 2001.

[Poster presentation]

Evaluation of magnetic resonance myelography in the imaging of cervical spondylosis.

British Society of Neuroradiology, Harrogate 2001.

[Oral presentation]

A comparison of 2D TOF MRA and gadolinium-enhanced MRA in the evaluation of carotid stenosis.
British Society of Neuroradiology, Harrogate 2001.
[Oral presentation]

Dynamic subtraction magnetic resonance venography for the detection of dural sinus thrombosis.
British Society of Neuroradiology, Harrogate 2001.
[Oral presentation]

Correlation of proton MR spectroscopy of primary intracranial tumours and histopathological findings.
British Society of Neuroradiology, Harrogate 2001.
[Oral presentation]

Vertebroplasty for painful vertebral collapse: preliminary experience.
British Society of Neuroradiology, Harrogate 2001.
[Oral presentation]

Correlation of MR spectroscopy and histopathological findings in gliomas: preliminary results.
Royal Australasian College of Radiologists Annual Scientific Conference, Melbourne 2001.
[Poster presentation]

Use of MR myelography in the evaluation of cervical spondylosis.
Royal Australasian College of Radiologists Annual Scientific Conference, Melbourne 2001.
[Poster presentation]

A case of unclassified leukodystrophy with rapid deterioration and early death.
European Paediatric Neurology Society, Baden-Baden 2001.
[Poster presentation]

A sphenoid mucocele with fungal infection: an unusual cause of transient pituitary dysfunction and sixth nerve palsy.
7th International Pituitary Conference, Denver 2001.
[Poster presentation]

Intraoperative ultrasound for the localisation of intracranial and spinal pathology: a pictorial review.
British Medical Ultrasound Society Annual Scientific Meeting, Eastbourne 2000.
[Poster presentation]

Ultrasound imaging in the assessment of extracranial – intracranial vascular bypass procedures.
British Medical Ultrasound Society Annual Scientific Meeting, Eastbourne 2000.
[Poster presentation]

B Flow ultrasound imaging for the angiographic display of carotid atherosclerotic stenosis.
British Medical Ultrasound Society Annual Scientific Meeting, Eastbourne 2000.
[Poster presentation]

CT angiography for the evaluation of carotid atherosclerotic plaque: correlation with histopathology of endarterectomy specimens.
Royal College of Radiologists Annual Meeting, London 2000.
[Poster presentation]

CT angiography for the demonstration of carotid artery atherosclerotic disease.
Radiology 2000, Birmingham 2000
[Poster presentation]

Analysis of intracranial mass lesions using proton MR spectroscopy at 1.0T.
Royal Australasian College of Radiologists Annual Scientific Conference, Sydney 1999.
[Poster presentation]

Carotid Artery Stenting: Results in 55 Patients.
Royal Australasian College of Radiologists Annual Scientific Conference, Sydney 1999.
[Poster presentation]
Resolution of third nerve palsy following endovascular occlusion of aneurysms of the posterior communicating artery.
Royal Australasian College of Radiologists Annual Scientific Conference, Brisbane 1998.
[Poster presentation][Winner, Best Poster Presentation.]

Retrospective analysis of clinical outcome in elderly patients with a ruptured cerebral aneurysm treated by surgical clipping or intravascular coil occlusion.
Neurosurgical Society of Australasia Annual Scientific Meeting, Melbourne 1998.
[Poster presentation][Winner, Best Poster Presentation.]

Analysis of intravertebral axial rotation in adolescent idiopathic scoliosis using three-dimensional MRI.
International Society for MR in Medicine, Sydney 1998.
[Poster presentation]

Cerebral mucormycosis.
Australian Neurology Association, Brisbane 1998.
[Poster presentation]

Carotid artery stenting – results in the first 30 cases.
Australasian Interventional Radiology Society, Broome 1998.
[Oral presentation]

MRI appearances of hyperacute, acute and subacute intracranial haemorrhage in infants and young children at 0.5 Tesla.

European Society of Neuroradiology, Oxford 1997.

[Poster presentation]

Correlation of myelopathy and MR appearances in cervical spondylosis.

Roentgen Centenary Conference, Birmingham 1995.

[Poster presentation]
